

Universal RCP

After ten successful years of operation the Camera Corps CCU Panel is being replaced with this brand new product.

Many new and advanced features have now been added making this even more powerful and user friendly than before.

Any of the six channel selection buttons can be allocated to any of the available camera types with selection by Manufacturer and Model No.

Intuitive menu selection matching other Camera Corps products.

Interface for six cue/tally inputs and external channel selection.

Camera Corps standard data transmission system using balanced audio provides for unlimited control distances.

Control options for driving DC Iris motors.

Optional upgrade to 3D mode allows either one or two 3D rigs to be controlled with dedicated channel buttons for 'Left', 'Right' and 'Left + Right' camera control.

Inexpensive upgrade route to add new camera models as the new protocols are added to the system.

Features

- Desktop or standard size rack mount (Mounting system can be quickly changed)
- Six channel buttons can be assigned to any available camera make/model
- Presetting of remote head Pan, Tilt, Zoom and Focus
