

## MeerCat - Mini Right Angle Camera

This new product from Camera Corps fulfils the need for a small very high quality HD camera which can be mounted vertically in places where most cameras won't fit.

A small power supply and interface box can be up to 30m away from the camera position. The RCP can be an unlimited distance away from that point as it only feeds balanced audio data for control.

The camera produces HD-SDI directly which can then be converted to fibre using one of the Camera Corps fibre boxes.

- All common HD formats supported
- Standard 1/4" mounting
- Range of high quality NF mount lenses available
- Up to 30m control cable from camera to PSU and Interface box
- Up to 6 camera control from a single RCP
- Manual Iris lens with adjustable electronic exposure control
- No limit on data control distance

### Features
